Experience

July 2026 - Present
Dallas TX

ComPsych · Lead Software Engineer

Led a team of developers, quality assurance engineers, and business analysts. Used AI to troubleshoot complex technical problems, **Junie**. Improved the data quality of a critical database, **SQL**. Developed reusable UI components, **Angular | TypeScript | Nx | NPM**. Improved the error handling of an essential end user authentication system, **Spring Boot | Java**. Contributed to quarterly planning and product strategy meetings. Wrote clear documentation that reduced development time from months to weeks, **SQL | notepad++**. Partnered with coding agents to deliver high quality code rapidly, **Claude Code | Cursor**. Extended an AI so that it could easily execute a production deployment, **Claude Code | GCP | Cloud Run | Docker | Kubernetes**. Extended an AI so that it wrote high quality maintainable code, **Claude Code**. Extended an AI using RAG and prompt engineering techniques.

Jan 2025 - July 2026
Plano TX

JPMorganChase · VP Lead Software Engineer

Optimized the performance of critical infrastructure by using concurrency, parallelism, and improved logic, **React | TypeScript | Spring Boot | Java**. Upgraded and modernized application dependencies, **Spring Boot | Maven | React | NPM**. Worked with business partners to design clear, efficient user experiences and developer friendly mock ups, **Lucid**. Used a data stream to provide search results to the UI from numerous, enormous database tables in real time, **StreamingResponseBody | CompletableFuture | The Fetch API**. Developed an end user authentication system, **IDAnywhere | Active Directory Federation Services**. Attended the innovation week AI conference. Developed an Agentic AI, **Gemini**. Developed a machine learning model that provides linear regression predictions, **TensorFlow | Node.js | Express**.

Jan 2020 - Dec 2024
Redmond WA

Google · Software Engineer

On contract assignment through Judge, maintained and enhanced an application that visualizes Google data centers, **Angular | TypeScript | Flask | Python**. Wrote practical unit tests that confirm components behave as expected, insightful integration tests that confirm dependent components are properly bound, and visual regression tests that confirm the views are pixel perfect, **Catalyst | Scuba**. Maintained and improved build infrastructure, **Blaze**. Processed and aggregated large data sets using functional programming streams, **RxJS**. Resolved complex, cross component state management problems, **NgRx**. Ensured source data was valid and bug free prior to import, **Java**. Ensured data structures remained consistent across numerous languages, services, and applications, **Protocol Buffers**. Designed and implemented security requirements to safeguard sensitive cloud resources and ensure end user authentication, **Firebase | Google Cloud**. Distilled complex software engineering problem solving into clear, concise design documents, **Google Docs**. Used atomic transactions and external consistency to manage globally distributed data, **Spanner | Google Cloud**. Partnered with Smart Compose Machine Learning coding assistant to deliver high quality code rapidly.

Jun 2023 - Jun 2024
Westlake TX

Fidelity · Full Stack Software Engineer

On contract assignment through Dexian, wrote, deployed, and monitored microservices that securely integrated with enterprise services, **Node.js | Kubernetes | ArgoCD**. Ensured services were easy to query and had a clear, well documented interface, **GraphQL | Apollo | Nest**. Created dashboards that provided real time user metrics as well as insights into the performance of the production server, **Catchpoint | Splunk**. Wrote and published common UI

components, **Angular | TypeScript | Artifactory | NPM**. Worked in and contributed to a highly structured monorepo, **Nx | Domain-driven design**. Used pattern recognition to extract useful information from complex networking data, **Splunk | Regular expressions**. Supported business partners by coordinating with architects and providing clear technical direction.

Jan 2022 – Mar 2023
Flower Mound TX

Intellicentrics · Technology Lead

Developed a suite of applications for scheduling and credentialing health care professionals, **Angular | TypeScript | Spring Boot | Java**. Advocated in favor of engineering best practices such as unit testing and the principles of Bob Martin. Wrote high quality, easy to read, easy to test code in the functional style, **RxJS | NgRx**. Maintained and developed automated deployment pipelines, **AWS | Bitbucket | Jenkins**. Containerized, deployed, monitored, and configured microservices, **Docker | Helm | Kubernetes | ArgoCD**. Authenticated users and configured role based microservice access, **WSO2**. Provided day to day technical guidance and code review to numerous developers, **Agile**. Aided business partners by breaking high level goals into actionable tasks, **Jira | Agile**.

Nov 2018 – Jan 2020
Irving TX

Citi · UI Developer

Developed critical components for citi.com, **Angular | TypeScript | Spring Boot | Java**.

Aug 2018 – Nov 2018
Bellevue WA

T-Mobile · UI Developer

Developed an application that analyses the security risk of other applications.

May 2018 – Aug 2018
St Louis MO

Wells Fargo · UI Developer

Developed an application that ensures compliant, ethical stock trading practices.

Jun 2017 – May 2018
Redmond WA

Microsoft · UI Developer

Designed and developed intuitive, professional, digital experiences for internal stakeholders.

Jul 2016 – Jun 2017
Remote

Gnostech · UI Developer

Designed and developed intuitive, professional, digital experiences for the US Navy.

Aug 2015 – Jul 2016
Bothell WA

Sonosite · UI Designer

Designed delightful, intuitive, professional digital experiences for ultrasound technicians.

Education

Sep 2010 – May 2015
Cincinnati OH

University of Cincinnati · Student

Achieved Bachelor of Science in Design with UI Design and Software Development focus.

Sep 2007 – May 2014
Cincinnati OH

University of Cincinnati · Student

Achieved Bachelor of Arts in English with Comparative Literature focus.

May 2010 – Sep 2010
Munich Germany

Ludwig-Maximilians Universität · Student

Studied UI Design, Software Development, Bavarian culture, and the German language.
